What you can give-and-take on Climate-ADAPT

A platform for collecting and sharing information on climate change adaptation in Europe

The Climate-ADAPT database offers a quality-checked knowledge base on climate change impacts, vulnerability and adaptation in Europe. You can look for or share information on adaptation case studies and potential adaptation options; tools that support adaptation planning and decision-making; EU, national and transnational adaptation strategies and actions; current or future vulnerability of regions and sectors, and much more.

Search the database!

Three examples of the types of content that you can find or provide on the platform

CASE STUDIES
Regeneration efforts in Augustenborg, Malmö, Sweden, for **urban storm water management**

ADAPTATION OPTIONS
Rehabilitation and **restoration of rivers, floodplains and wetlands**

RESEARCH PROJECTS
ClimeFish: a decision support framework to ensure sustainable fish

How the platform has been used

Climate-ADAPT knowledge is used across Europe in a variety of processes supporting adaptation decision making at different governance levels and stages of the policy cycle. Research, development of evidence documents feeding into policy, elaboration of national adaptation strategies and plans, participatory approaches, preparation of funding proposals and much more.

Discover the exemplary use cases presented on the platform!

Three use cases of the platform, from the local to the regional level:

CITIES - Cascais used Climate-ADAPT for training staff in a network of municipalities to develop local adaptation plans

REGIONS - Sardinia The regional government used Climate-ADAPT for accessing European knowledge to support cooperation across governance levels

COUNTRIES - Turkey used the Adaptation Support Tool for developing a project proposal to revise the National Adaptation Strategy and Action Plan of Turkey
